Introducing Greater Goods grocery store (reference site)

Folks,

I've developed a website called Greater Goods Grocers. (the site concept is shoppers earn points to donate to local charities).

It is developed using the same technologies as we are teaching in the course for the bookstore.

- The site is running at <https://cs5244.cs.vt.edu:8443/GreaterGoodsGrocers/>.
- The server code is available at <https://github.com/nowucca/greater-goods-server/tree/release>
- The client code is available at <https://github.com/nowucca/greater-goods-client/tree/release>

I'm releasing this a little later than usual since I have been out of action for a few days with a bad cold and fever.

It is not necessary to install or run this project on your own computer but I can help if you need that.

Please use it as a resource to answer questions about how to organize and/or write code for the rest of the course.

Dr A.
